AURUM

Investor Onboarding Guide

From your first sign-up to your personal Aurum monitor

WELCOME

Your journey with Aurum

Dear Investor, welcome to Aurum, the private trading programme of Dương Gia Holdings. This short guide walks you through every step of joining — from creating your own OKX account to the moment your personal Aurum assistant greets you on Telegram. No prior experience is needed; every step is written for beginners and takes only a few minutes.

The seven steps ahead

- ◆ Step 1 — Create your OKX account with the DGHVN invitation code
- ◆ Step 2 — Verify your identity (KYC)
- ◆ Step 3 — Deposit funds through P2P trading
- ◆ Step 4 — Prepare your Futures account
- ◆ Step 5 — Create your API key
- ◆ Step 6 — Send us your four details
- ◆ Step 7 — Meet your personal Aurum assistant

A principle we live by

Your money never leaves your own OKX account. Aurum trades on your behalf through a strictly limited connection that can never withdraw — you remain in full control of your funds at all times.

STEP 1

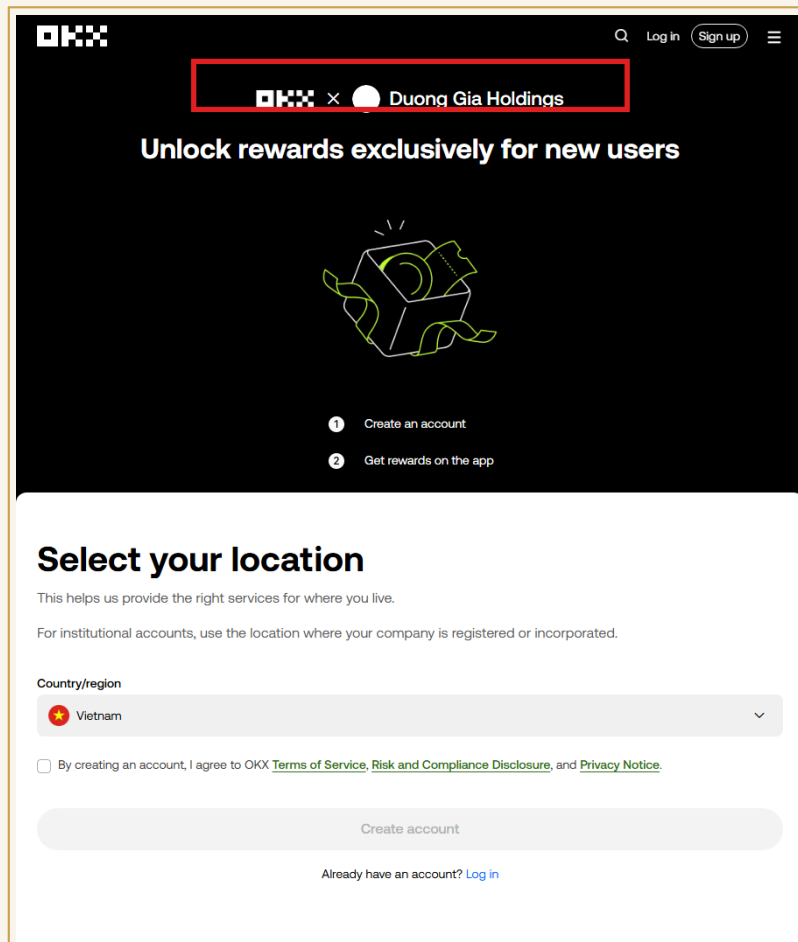

Create your OKX account

OKX is one of the world's largest digital-asset exchanges, and it is where your personal account will live.

- ◆ Download the OKX app (App Store / Google Play) or visit okx.com.
- ◆ Choose Sign up and register with your e-mail or phone number.
- ◆ When asked for a referral / invitation code, enter: **DGHVN**
- ◆ Set a strong password and finish the registration.

Why the code matters

The DGHVN code links your account to the Dương Gia Holdings community and its fee benefits. It can only be entered at sign-up, so please do not skip it.

The image is a screenshot of the OKX mobile application's sign-up interface. At the top, there is a dark banner with the OKX logo on the left and a search icon, 'Log in', and 'Sign up' buttons on the right. A red rectangular box highlights a referral code banner in the center of the top section, which displays the OKX logo, a small 'x' icon, and the text 'Duong Gia Holdings'. Below the banner, the text 'Unlock rewards exclusively for new users' is displayed. Underneath this is an illustration of a green gift box with a ribbon. A two-step process is shown: '1 Create an account' and '2 Get rewards on the app'. The main section of the page is titled 'Select your location' and includes a subtext: 'This helps us provide the right services for where you live. For institutional accounts, use the location where your company is registered or incorporated.' Below this is a 'Country/region' dropdown menu with 'Vietnam' selected. A checkbox is present with the text: 'By creating an account, I agree to OKX Terms of Service, Risk and Compliance Disclosure, and Privacy Notice.' At the bottom of this section is a large 'Create account' button. Below the button, it says 'Already have an account? Log in'.

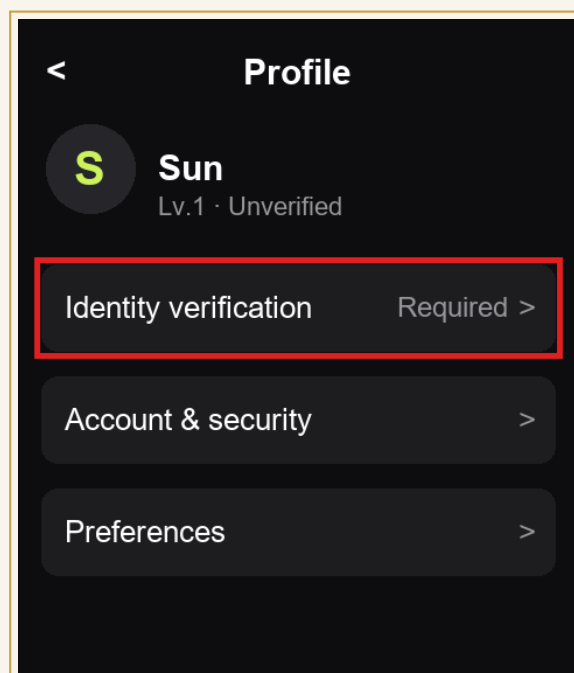

The sign-up page — the OKX × Duong Gia Holdings banner (red) confirms the DGHVN code is applied

STEP 2

Verify your identity (KYC)

Verification is required by OKX before you can deposit through P2P trading. It usually takes less than five minutes.

- ◆ In the app open Profile → Identity verification.
- ◆ Choose your country and ID card (or passport).
- ◆ Photograph the front and back of your document.
- ◆ Complete the short face scan when prompted.
- ◆ Wait for the approval notification — typically within minutes.

In the app: Profile → Identity verification (marked in red)

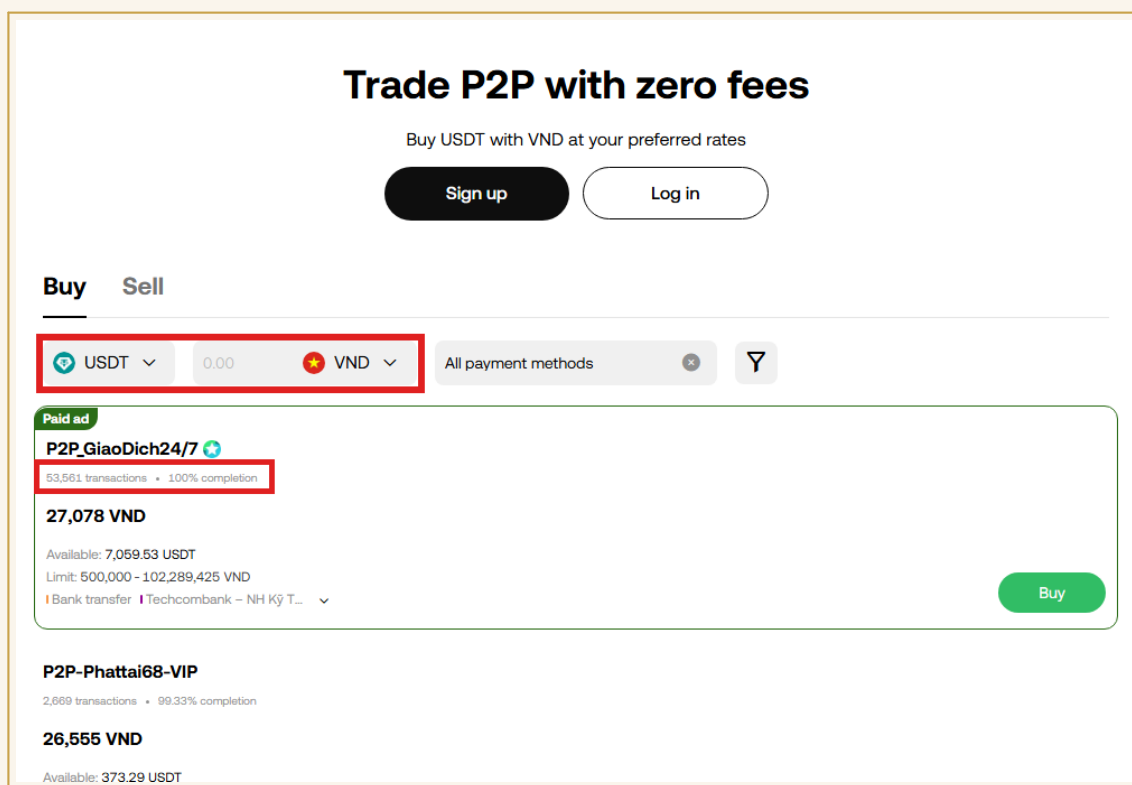

STEP 3

Deposit funds through P2P trading

P2P (peer-to-peer) trading lets you buy USDT — the digital dollar your account trades with — directly with a bank transfer in VND, safely inside OKX.

Buy USDT

- ◆ In the app choose Buy crypto → P2P trading.
- ◆ Select USDT and currency VND, then pick a merchant with a high completion rate.
- ◆ Enter the amount, place the order, and transfer the exact sum with your banking app using the reference shown.
- ◆ Tap Payment completed — the merchant releases your USDT within minutes.

OKX P2P — set USDT / VND (red) and pick a merchant with a high completion rate

STEP 4

Prepare your Futures account

Two short settings make your account ready to trade. Please do BOTH right after your deposit, before anything else.

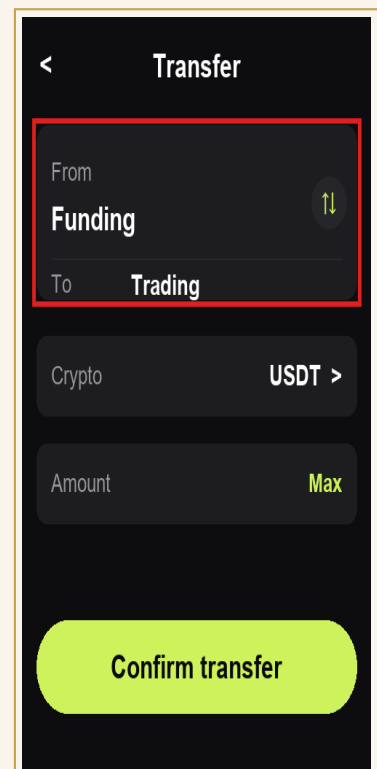

IMPORTANT — DO THIS BEFORE ANY TRADE

Set these while your account has no open positions.

Changing the position mode later, mid-trade, is not possible.

4.I

Move your USDT from Funding to Trading (Futures). P2P purchases arrive in the Funding account, where money cannot trade yet. Open Assets → Transfer, choose From: Funding → To: Trading, tap Max, and confirm.

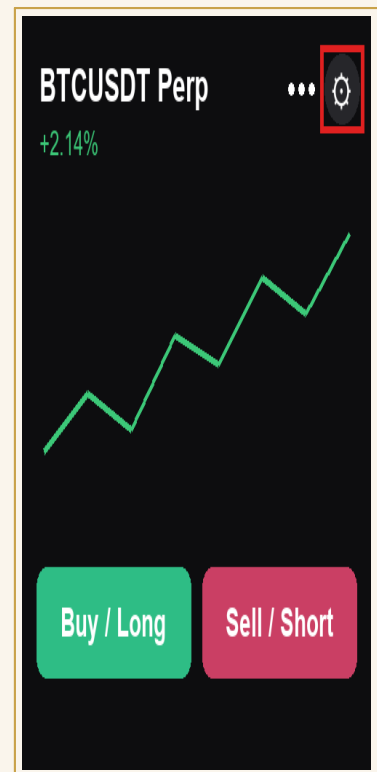

One-time account setting

Also in Profile → Account mode, please select Single-currency margin. This too is required once, before the first trade.

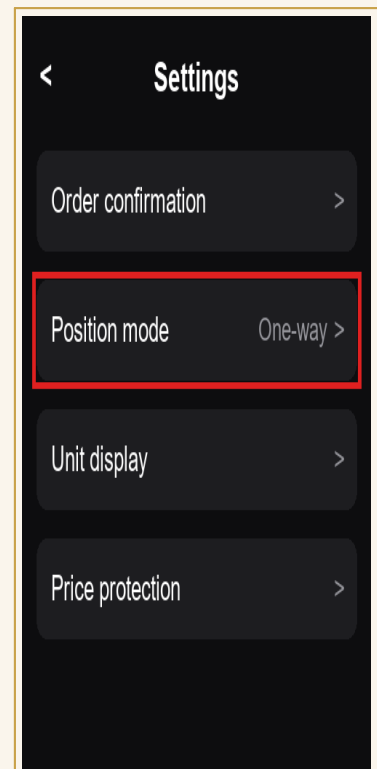

4.2

Open the Futures settings. Go to Trade → Futures and tap the gear icon (marked in red) at the top right.

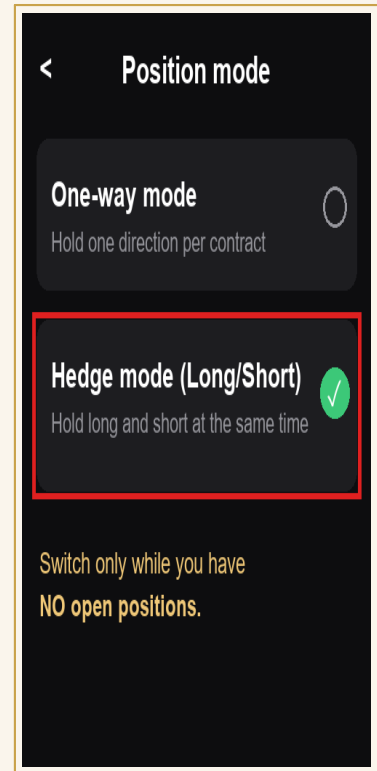

4.3

In the settings list choose Position mode (marked in red).

4.4

Select Hedge mode (Long/Short) and confirm. The green tick shows the active mode.

STEP 5

Create your API key

The API key is the secure bridge between your account and Aurum. It follows exact naming rules — please copy them precisely, then follow the illustrated steps.

API name	Aurum <Your name> — e.g. Aurum Jason
Passphrase	Aurum-<name>-26 — e.g. Aurum-jason-26
Trusted IP	45.77.45.202
Permissions	Read + Trade only — never Withdraw

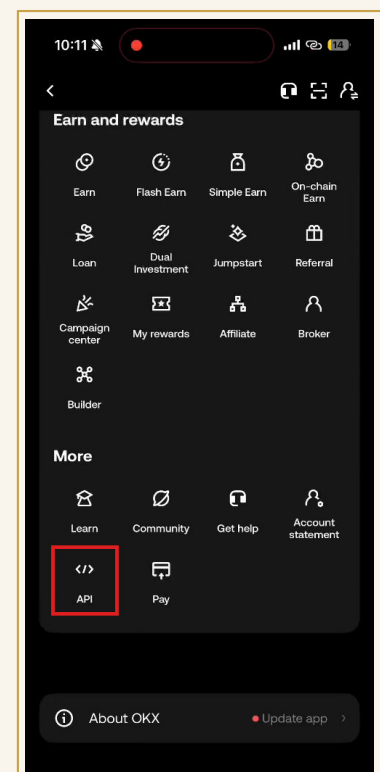

IMPORTANT — PERMISSIONS

Tick READ and TRADE only.

NEVER tick Withdraw.

5.1

Open the OKX menu and under More choose API, then tap Create API key.

5.2

API name: Aurum + your name — e.g. Aurum Jason (marked in red).

Purpose: API trading.

10:11

Create API key

0/1 draft completed

Aurum Sun

API name

Aurum Sun

Account

Main account

Purpose

API trading

Permissions

Read Withdraw Trade

Trusted IP access Recommended

Only trusted IP addresses can use this key

Passphrase

Enter API passphrase

Your password must contain:

Submit all

5.3

Permissions: tick Read and Trade — never Withdraw. Switch Trusted IP access ON and enter 45.77.45.202.

10:11

Create API key

0/1 draft completed

Aurum Sun

Read Withdraw Trade

Trusted IP access Recommended

Only trusted IP addresses can use this key

We block access from unknown IPs. Your key is safe.

45.77.45.202

Incorrect IP address. Enter a valid one.

Done

5.4

Passphrase: Aurum-<name>-26 — e.g. Aurum-jason-26. Every requirement turns green. Write it down — OKX will not show it again.

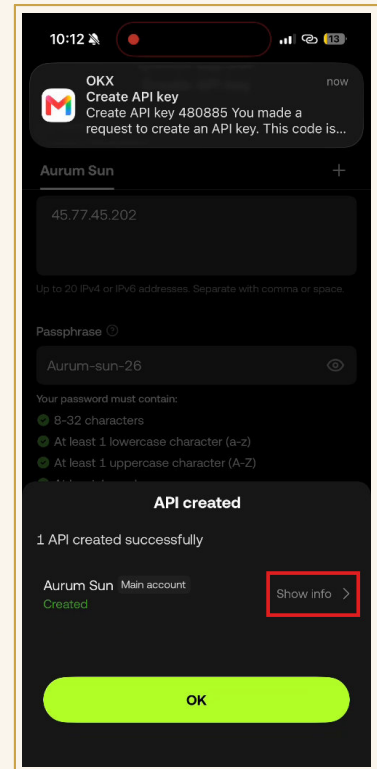

5.5

Check everything once more, tap Submit all and confirm with the verification codes (e-mail or authenticator app).

DO NOT SKIP THIS
Tap Show info and SAVE or screenshot the keys BEFORE pressing OK —
the Secret key is shown only once.

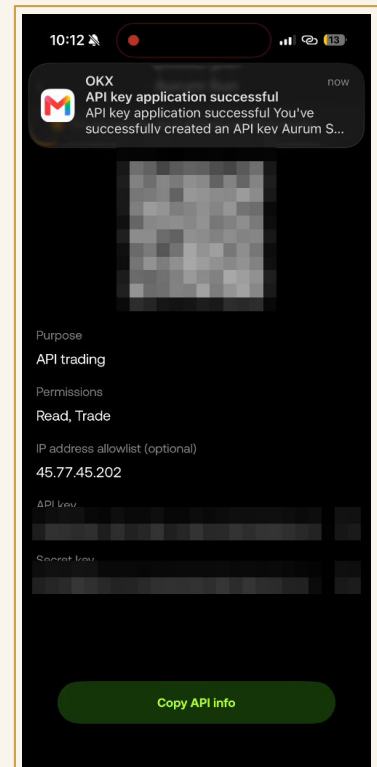

5.6

When API created appears, tap Show info (marked in red) — and save or screenshot everything before tapping OK.

5.7

On the info screen tap Copy API info or take a screenshot. These are exactly the details you will send us in Step 6.

STEP 6

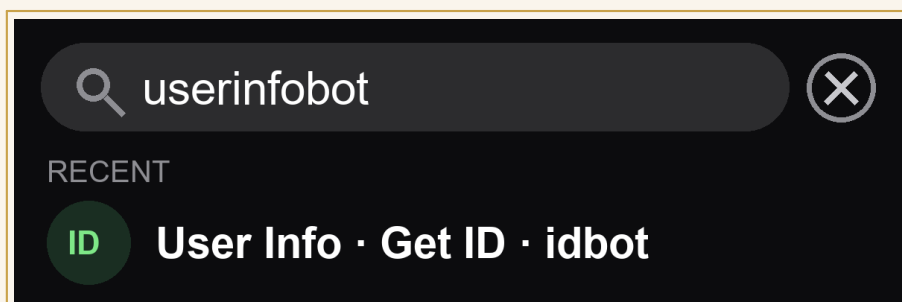

Send us your four details

To connect your account, we need exactly four pieces of information from you:

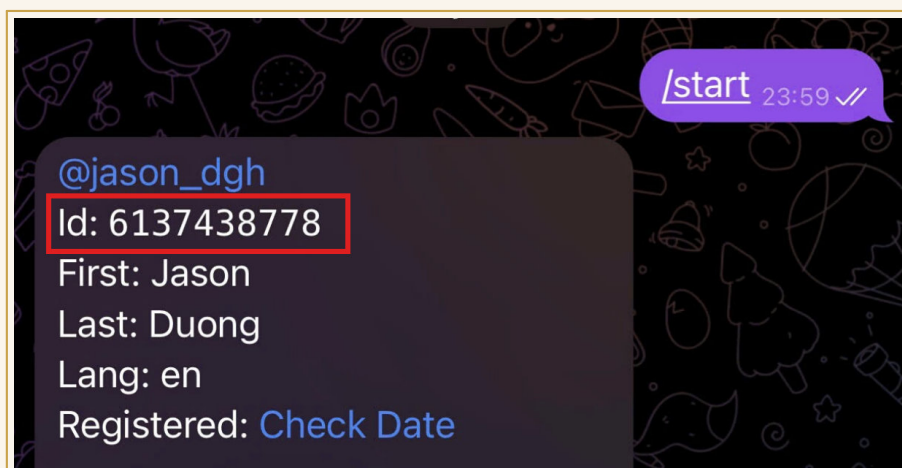

1	API key — from the Show info screen
2	Secret key — shown only once, copy it immediately
3	Passphrase — the Aurum-<name>-26 you created
4	Telegram ID — see below

Finding your Telegram ID

- ◆ Open Telegram and search for @userinfobot.
- ◆ Tap Start.
- ◆ The bot replies instantly — send us the Id number.

Search for @userinfobot in Telegram and open it

Press Start — then send us the Id number (marked in red)

Where to send your details

When all four pieces are ready, send them in one private message to our official Telegram — scan the QR code below, or search for @JASON_DGH.

@JASON_DGH

Scan with your phone camera or Telegram's QR scanner

Your security, by design

These keys can never withdraw money and only work from our private server (45.77.45.202). Even so, treat them like a bank card number: send them to us privately and to no one else.

STEP 7

Meet your personal Aurum assistant

Within a day of receiving your details, we connect your account and introduce you to your own private Telegram assistant — named Aurum followed by your name.

- ◆ You receive a link to your bot — tap Start to activate it.
- ◆ From that moment, it messages you the instant a position is opened or closed on your account.
- ◆ Every morning at 07:00, it sends your personal report of the last 24 hours.
- ◆ Tap Status whenever you wish — your balance and open positions, live.

Final checklist

- ☐ OKX account created with code DGHVN
- ☐ Identity verified (KYC)
- ☐ USDT purchased via P2P
- ☐ USDT moved from Funding to Trading (Futures)
- ☐ Position mode set to Hedge mode (Long/Short)
- ☐ Account mode set to Single-currency margin
- ☐ API key Aurum <name> created with IP 45.77.45.202
- ☐ Keys saved from Show info, four details sent to us privately
- ☐ Aurum bot activated with Start

We are delighted to have you on board — wishing you a rewarding journey ahead.
